

CITY OF WATERBURY WATER TREATMENT PLANT

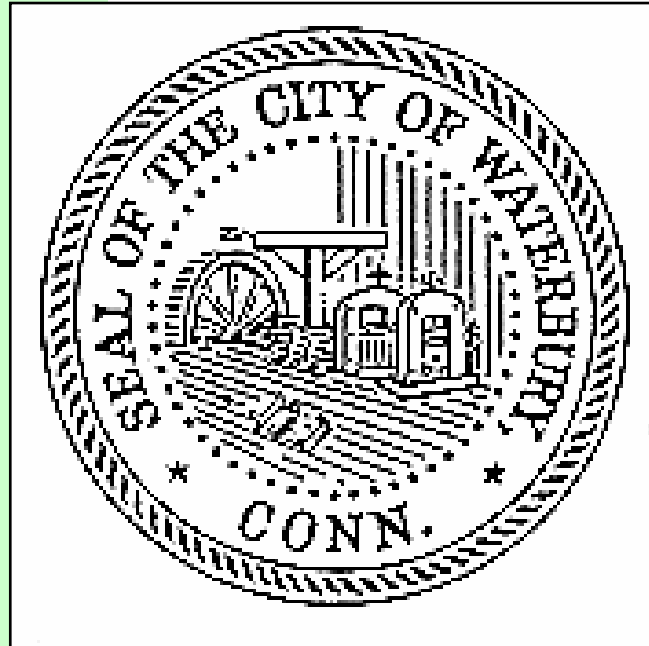

Waterbury, Connecticut

CLIENT:

City of Waterbury, Connecticut

PROJECT FEATURES:

- Procurement for operations and maintenance of 25-MGD Water Treatment Plant
- Assisted the City prepare an RFP, evaluate proposals and negotiate a contract for private operations of the Water Treatment Plant
- Assisted the City transition to new private contract operator

A private contractor has operated the City of Waterbury's water treatment plant since it was constructed six years ago. Prior to the expiration of the existing contract, the City (Bureau of Water) retained ARI to provide technical and financial assistance in preparing an RFP for continued private operation and maintenance of the plant. ARI then assisted in evaluation of proposals received and negotiation and preparation of the contract for continued operations and maintenance of the plant.

ARI continues to provide assistance to the Bureau of Water during transition to a new operator and for oversight during initial contract operations.
