

# BOROUGH OF NAUGATUCK WASTEWATER TREATMENT PLANT (WWTP) AND SEWAGE SLUDGE INCINERATORS

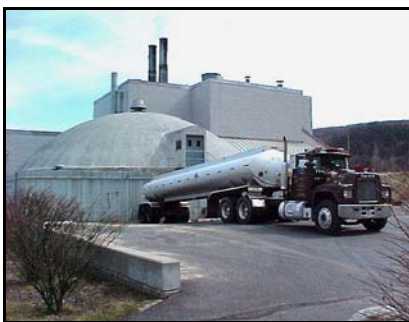

Naugatuck, Connecticut

## CLIENT:

Borough of Naugatuck, CT

## PROJECT FEATURES:

- 10 MGD WWTP with sewage sludge incinerators
- Management, technical and financial advisor
- Design/Build/Operate (D/B/O) procurement for upgrade of WWTP & sewage sludge incinerators
- Overall management responsibility in directing Borough's team of consultants
- Continue history of "no cost" operations with private vendor

ARI served as leader of a team of procurement, technical, financial, and legal advisors for the procurement to upgrade and provide long-term contract operation (20 years) of the Borough's 10 MGD wastewater treatment plant and sewage sludge incinerators.

ARI provided management, engineering, environmental and financial expertise. ARI was responsible for preparing the RFP, proposal evaluation, and contract negotiations with the selected proposer.

ARI also assisted the Borough in negotiating a short-term (one year) operating and maintenance contract to provide adequate time to negotiate the long-term contract and finance the capital improvements.

ARI assisted the Borough complete tax-exempt and taxable municipal lease transactions to support the implementation of the required capital improvements. The project is unique in that the Borough is seeking to continue its history of "no-cost" for wastewater treatment plant operations (i.e., revenues derived from incineration of outside sludge cover the cost of operating and maintaining the wastewater treatment plant).

Work commenced on this engagement in 1998. ARI is currently providing Contract Administration services, including design review, construction monitoring and operations monitoring.
